

SUGAR CANE

Chinese Academy of Agricultural Sciences (CAAS) conducted series of **INDEPENDENT** tests applying Orykta® to various types of crops grown in a wide range of different regions and soils throughout China.

Production increase rate of 12 crops reached R (remarkable) level of the national standard (>5%), and some even reached VR (very remarkable) level (>15%).

Baseline Plot (Control Group): normal fertilizer usage

Orykta® Plot: combine Orykta® with reduction in normal fertilizer usage by 30-40%.

Summary of Results:

Location	Soil Type	Yield Increased over Control Group
Guang Xi	Latosolic Red Soil pH 5.2	2.92-10.16%

Orykta® vs Control Group

- ✓ Increased by 43-103 cane/mu
- ✓ Sugar content increased by 0.69-0.93 BX
